

Experience

Decker Medicine LLC.

Lead Software Developer

Toronto, ON

Sep 2021 - Present

- **Role:** Lead development of a large-scale e-learning platform serving 10,000+ active medical residents and program directors
- **AI Tools:** Designed custom content generating AI tools to streamline author content creation processes
- **WebApp Optimization:** Rebuilt over 50% of customer facing pages to be up to 7x faster page load times, and an over 300% reduction in bugs.
- **Stack And Server Upgrade:** Executed a full-stack modernization project, upgrading the platform from Python 3.5 to Python 3.13, refactoring over 100 pages, and overhauling development and production server infrastructure to support future growth and maintainability.
- **Development Tools:** Setup a vast number of development tools for the company in order to streamline debugging, production updates, dev server maintenance, and user session logging.
- **Cloud Cost Reductions:** Reduced AWS database infrastructure costs by approximately 60% through RDS optimization
- **Reliability:** Reduced production wide downtime to under 0.1%
- **React:** Created several new customer facing pages in React, and rebuilt and optimized many others for better performance and consistency across the domain.

Squarebit Software

Lead Software Developer

Toronto, ON

Jan 2021 - Dec 2021

- **WebApp:** Designed and developed a full-stack safety application from the ground up, supporting workflows for the trades industry
- **Backend:** Built and maintained the backend using Django, including custom user models and dynamic form systems allowing users to fill out safety paperwork online.
- **PWA:** Delivered the application as a Progressive Web App (PWA), enabling app-like functionality on mobile devices.

Port 80 Web Design

Web Developer - Client Support

Toronto, ON

Apr 2020 - Jan 2021

- **E-Commerce:** Developed and maintained Shopify storefronts as part of a distributed team across Canada, supporting a range of e-commerce clients
- **API:** Worked with the Shopify API and third-party applications to extend platform capabilities and implement custom features
- **Quality Assurance:** Managed product catalogs, customer data, and store configurations, ensuring accuracy and consistency across environments

Projects

- **Artist Portfolio:** Created a custom portfolio page for a major art producer [<https://waltconnelly.com>]
- **Restaurant/Showroom Website:** Set up a website to kickstart a new restaurant and showroom
